

OSINT Intelligence Report

Hezbollah Telegram Activity - Blida Incident

(Oct 30 2025)

Analyst: Ziv Kaufman

Counter-Terrorism / Open-Source Intelligence (OSINT)

Executive Summary

An OSINT investigation of the Hezbollah Telegram channel “حزب الله الإلكتروني” revealed a coordinated information campaign surrounding the Blida incident (southern Lebanon, 30 Oct 2025).

Within two hours the channel released over 20 messages mixing motivational content, battlefield updates, and official statements.

The purpose was to justify retaliation, portray Israel as the aggressor, and strengthen public alignment between Hezbollah and Lebanese state institutions.

Timeline (Key Moments)

Time (UTC+3)	Event / Message	Classification
11:17 – 11:31	“أولي البأس” series – moral & religious motivation	Psychological Ops / Propaganda
11:22 – 11:31	Reports from Tulkarm & Khan Younis, civilian casualties & damage	Operational Narrative
12:16	Official Hezbollah statement on Blida attack, accusing Israel & U.S.	Strategic Messaging
12:41 – 12:55	Reactions from Parliament & Municipal leaders, calls for unity	Political Legitimization
13:10 – 13:39	Alerts on Israeli activities & upcoming speech	Continuity of Narrative

Key Findings

- 1. Coordinated Messaging: High-frequency posting (≈ 20 msgs / 2 h) suggests a managed media cell.
- 2. Hybrid Narrative: Operational facts + emotional religious frames = strong audience mobilization.

- 3. Political Integration: Quoting state actors to elevate Hezbollah's legitimacy.
- 4. Escalation Signal: Language shift from "incident" to "war crime" may precede physical response.
- 5. Cross-Language Amplification: Persian-language posts mirror Arabic ones, indicating regional coordination.

Indicators of Compromise (IOCs)

- Channels: @nezamitarin, حزب الله الإلكتروني
- Hashtags: #أولي_البأس, #الإعلام_الحربي, #لبنان, #فلسطين_المحتلة
- Event Marker: "إعدام إبراهيم سلامة" (Blida Municipality employee)
- Active Window: 30 Oct 2025 11:17–13:39 UTC+3

Recommendations

1. Monitor Cross-Posting – track republication of #أولي_البأس across affiliated channels.
2. Map Network Links – collect and graph Telegram IDs sharing identical phrasing.
3. Correlate with External Sources – verify Blida event details via LAF / UNIFIL / Reuters.
